

Otterton Footpath and Rights of Way Signs - May 2019 Update

P = Place only, FP = new finger post, LP = long / tall post

Existing Finger posts

- | | | |
|---|---|-----|
| 1. Brendon Lane (311) | Post made, to be placed | P1 |
| 2. Passaford Lane (301) | Post made, to be placed | P2 |
| 3. Bar's Lane (308)
post with 3 arms (see below) | One of 3 arms fallen off (by Seaview Farm), post leaning. Purchase new finger post with 3 arms (see below) | FP1 |
| 4. Colliver Lane (3) mid way
abandon | Cut down rotten base and re-place in ground, other signs nearby, in long term | P3 |
| 5. Bay Road (8) | The sign is hidden In shrubs (jn to back road to Seaview) and rotten at base. John to discuss with Steve (Ladram Bay) - I suggest replacing with long post (no arms) – it will be easier to see and will no obstruct. | LP1 |

Existing Long Posts

- | | | |
|---|---|-----|
| 6. Holestone Lane (303) | (N end of stream) leaning in hedge, post OK – re-place in ground | P4 |
| 7. Sewage Works PP
undergrowth, abandon. | Fallen due to rot at base (outside works) – other signs around, hidden by | Nil |

Existing Short Posts

- | | | |
|---|---|-----|
| 8. Colliver Lane (3) | Fallen due to rot at base (mid way) – replace with new long post | LP2 |
| 9. Holestone Lane (303) | Fallen due to rot at base (Junction with 306 / 307), replace with long post as it gets hidden in undergrowth. | LP3 |
| 10. Bar's Lane (308) | Fallen due to rot at base (Junction with 307) replace with long post as it gets hidden in undergrowth. | LP4 |
| 11. Chockenhole Lane (305) | At angle - Hit by tractor (Junction with Bar's Lane) replace with long post so it can be seen . Position carefully to avoid tractor damage. | LP5 |
| 12. Chockenhole Lane (305) | At angle / damage – Flailed by tractor (near road) | LP6 |
| 13. Mutters Moor PP | Fallen – bottom of plantation) – replace with Long post as in undergrowth. Difficult to access, I will try get CDE)to erect. | LP7 |
| 14. Sewage Works PP | Missing – outside works, vehicle damage – abandon as too near vehicle turning bay, other signs nearby. | Nil |
| 15. Watering Lane in field, post rotten at base, disturbed by ploughing. Replace by long post, easier to see from distance. | | LP8 |

16. Chockenhole Lane 305/306 junction, post rotten at base, still in position but needs replacing soon. Replace with long post. LP9

Summary

- One new finger post to be ordered
- Nine new long (or medium) posts to ordered
- In total 14 posts will need to be placed in the ground. The ground is quite stony. DCC to advise if concrete needed.

Post Lengths – to be confirmed by DCC.

- Short post is about 80-90cm above ground (total length say 1.2m)
- Medium Post is about 1.5 to 1.6m above ground (total say 2m)
- Long post is about 2m above ground (total say 2.4m)
- Some posts have walking men or other symbols, I propose not to replicate them as it will be expensive and complicated.

Bar's Lane (308) details

- Three arms (one currently missing)
- NE arm is 600mm long and says "PUBLIC RIGHT OR WAY, BAR'S LANE" OVER 2 LINES, this only needs to be on RHS looking away from post.
- SW arm (now missing) says "OTTERTON" , this only needed on LHS
- SE arm only has a circle at present - I suggest we have "LADRAM BAY" over 2 lines to keep it as short as possible away from traffic.
